### **Different Patterns of**

#### **Evolution - dummies**

Evolution over time can follow several different patterns. Factors such as environment and predation pressures can have different effects on the ways in which species exposed to them evolve. shows the three main types of evolution: divergent, convergent, and parallel evolution.

### SparkNotes

Understanding these patterns on a small scale can help in determining the relatedness of species over longer periods of time. There are three main patterns of species evolution.

Convergent evolution occurs when dissimilar species gradually become more similar.

This usually happens as a result of sharing
