### CEMC's Open Courseware - Grades 7 & 8 Mathematics

A set of resources on an introduction of the properties of a circle, circumference of a circle and area (with estimating). I have used some resources already available on tes and adapted them to fit our school. Let me know what you think.

### Circles (Low Ability) | Teaching Resources

A circle is an important shape in the field of geometry. Let's look at the definition of a circle and its parts. We will also examine the relationship between the circle and the plane. A circle is a shape with all points the same distance from its center. A circle is named by its center. Thus, the circle to the right is called circle A since its center is at point A.

### Geometry and the Circle | Math Goodies

Draw a circle on the board. Explain to your students that circles are round and have no sides. Show your students images of a lollipop and a snowman. Ask a student to come to the board and point to the circle on the snowman. Ask another student to come to the board and point to the circle on the lollipop.
