### Corrosion Engineering

Corrosion Engineering is a leading global designer and manufacturer of high performance engineered wear-resistant products for the Mining & Aggregate Industries. Over our 40 year history, we have led the industry in the development and application of world-class wear-resistant products utilizing only the finest quality raw materials and technologies.

### Corrosion Engineering

Corrosion prevention measures, including Cathodic protection, designing to prevent corrosion and coating of structures fall within the regime of corrosion engineering. However, corrosion science and engineering go hand-in-hand and they cannot be separated: it is a permanent marriage to produce new and better methods of protection from time to time.

Our lab can create corrosion coupons, and perform metallurgical analysis on metals to provide micro-hardness testing, thermal resistivity, FEA analysis, and corrosion elemental analysis to determine cause of corrosion. We also provide corrosion rate analysis of metals in various soil corrosivities and environments to aid in design specifications.
