Explanation of how global warming occurs Normally, when the sun ray hits the earth, it is reflected back into space. However, excess carbon dioxide in the atmosphere acts as an insulator and traps the sun rays and thereby preventing it from reflecting back into space. As a result, the average temperature of the earth goes up.

Quia - Computer Applications

Multiple choice questions operate in the 'recognition' domain of recall; the answer is there to select. As this domain is the most cognitively straightforward, other aspects of the question are often adjusted to make the question more challenging. The level of science demand may be increased or the science given an unfamiliar context.
