Official estimates indicate that total world gold production since the beginning of civilization has been around 6,109,928,000 troy ounces (190,040.0 t) and total gold production in Nevada is 2.5% of that, ranking Nevada as one of the Earth's primary gold producing regions.

## **Gold mining - Wikipedia**

Early Gold Finds and Production Gold was produced in the southern Appalachian region as early as 1792 and perhaps as early as 1775 in southern California. The discovery of gold at Sutter's Mill in California sparked the gold rush of 1849-50, and hundreds of mining camps sprang to life as new deposits were discovered.

## **Gold: History of Use, Mining, Prospecting, Assay & Production**

Each year, global gold mining adds approximately 2,500-3,000 tonnes to the overall above-ground stock of gold. While gold production has shown an upward trend in recent years, this is likely to level off in coming years. Accurately estimating the amount of gold still within the ground is no easy task, and this estimate may change in response to several factors, such as:
