Gabrielle Warner Introduction Why are the sheep brain and cow eye used to study anatomy? By using the sheep brain and cow eye, learning becomes easier. I am a hands on learner and when i can touch or see things i am able to make connections

Brain and Eyeball Dissection Lab Report by Gabby Warner

RED is used to catch your eye. The dissection of the sheep's brain will assume the following sequence. You'll begin with a careful examination of many of the external features of the brain. The next step of the dissection will require that you bisect the brain along the longitudinal midline to produce a mid-sagittal section. A midsagittal section allows many of the prominent features of the internal and medial face of the hemispheres to be observed.
